About PAS

The Percussive Arts Society is the world's largest percussion organization and is considered the central source for information and networking for percussionists and drummers of all ages.

PAS offers students and professionals opportunities to grow artistically and professionally. PAS proudly awards over \$60,000 annually in scholarships and grants. Professionals can create new percussion programs or gain recognition through PAS grants and contests. Many individuals have significantly impacted the world of percussion through the Percussive Arts Society, and they are recognized in our Hall of Fame and Awards pages.

PAS publishes the Percussive Notes journal six times a year, shares weekly content on Rhythm! Scene™ the official blog of the Percussive Arts Society, and maintains a comprehensive website of percussion education resources.

PAS is headquartered in Indianapolis, Indiana, and is home to the Rhythm! Discovery Center. Founded by PAS in 2009, Rhythm! Discovery Center serves as the definitive place where the history of percussion is preserved, celebrated, and shared. Dynamic exhibits feature instruments from leading percussionists and promote the understanding of percussion and its role in world cultures through interactive educational experiences.

In addition, more than 60 domestic and international PAS Chapters host Day of Percussion® events and other clinics in their regions throughout the year.

PERCUSSION

Percussion World Tour

Led by PAS, this is a game that revolves around percussion instruments around the globe. From America to Asia, going through Africa, our main goal is to show the players the diversity in cultures and their music; as their drums are strongly tied to their history. We aim to achieve all of this with a simple yet fun musical game that will test the players skills and challenging them to catch the **rhythm**.

PAS

Next to PAS, we manage to gather data about players around the globe in order to analyze and understand how users like or dislike the game, so as how their abilities increase as they continue playings. To check this data, click on the following button. [Tableau](#)
